## About us

As Poland's first manufacturer of FIA-homologated bucket racing seats, Bimarco is an established name in the field of motorsports both domestically and internationally. With a relentless commitment to quality, versatility, and customization, our racing seats have garnered recognition and patronage from clients across the globe.

### Product Portfolio

Bimarco offers a diverse range of seating options tailored to meet the demands of various motor racing disciplines. Currently, the lineup features:

FIA 8855-1999 Homologated Models: Bimarco Matrix FIA, Bimarco Hamer Pro FIA, Bimarco Phantom FIA, and Bimarco Cobra Pro FIA

Non-Homologated Models: Bimarco Racer, Bimarco Speed, Bimarco Dynamic, Bimarco Cobra 2, and Bimarco Cobra 3

Off-Road Variant: The Bimarco Cobra Pro OFFROAD FIA is a specialized seat without upholstery, designed explicitly for off-road vehicles, including UTVs (available with homologated and non-homologated shell).

### Quality and Performance

Our products consistently pass rigorous endurance tests across different types of motor racing—from high-profile rallies to national championships and flat or mountain races. Trusted by a roster of well-regarded and decorated competitors, Bimarco's bucket seats serve as reliable companions in mastering powerful machines on challenging terrains.

### Versatility and Customization

At Bimarco, we recognize that the needs of our clientele are as diverse as the motor sports they participate in. That's why we have designed our products to be versatile and customizable. Whether you're a professional rally or racing driver, an automotive sports enthusiast, or a sim-racing aficionado, there's a Bimarco seat engineered with your specific requirements in mind.

### International Recognition

The reach of our products extends beyond Poland's borders, finding resonance in the international motorsports community. It's not just about the product; it's about delivering a solution that champions the needs of those who are serious about performance on the track or off it.

### Join the Winners' Circle

We invite you to explore our product range and discover what has convinced many in the motorsports community to place their trust in Bimarco. Elevate your driving experience; join the ranks of winners who have chosen Bimarco's uncompromising quality and performance.

Your success on the track is our mission.

## What is RTM technology?

In our advanced manufacturing process, we utilize our in-house developed Resin Transfer Molding (RTM) technology. This represents a breakthrough in bucket seat construction. Thanks to this innovative method, it's possible to create a lighter and simultaneously more durable fiberglass seat shell.

RTM allows for an impressive 30% weight reduction compared to standard solutions, without compromising strength and rigidity. These are crucial factors for performance and safety. Moreover, our seats are now produced using closed-mold RTM technology. This not only enhances product quality but also takes a significant step towards environmentally friendly production.

This cutting-edge technology enables us to offer seats that are not just lighter and stronger, but also manufactured in a more sustainable way.

## Bimarco FIA 8855-1999 homologated seats

FIA STANDARD: **8855-1999**  
 Manufacturer name: **BIMARCO**  
 Model: **MATRIX**  
 Homologation N°: **CS.472.21**  
 Validity duration: **up to 6 years**

The Bimarco Matrix is a cutting-edge motorsport bucket seat meticulously designed to suit drivers with larger dimensions. This seat encapsulates the perfect fusion of comfort and performance, engineered primarily for those requiring the pinnacle of safety and comfort during intense racing circuits.

Constructed using Bimarco's RTM (Resin Transfer Molding) technology, the seat boasts a significant weight reduction of up to 30% when compared to standard bucket seats. This innovative method results in a seat that is both stiffer and lighter, with a fibreglass shell that perfectly complements its modern design. Furthermore, the seat's non-slip material ensures optimal support, allowing the driver to perceive every movement of the car, enhancing both immersion and control.

#### Notable Features:

1. FIA Homologation 8855-1999 approved, ensuring adherence to the highest safety standards set by the International Automobile Federation.
2. Distinct "halo" features, offering additional head support and protection during potential side collisions.
3. M8 side connectors spaced 290mm apart.
4. Removable cushions for the back, seat, and legs, maximizing customization for user comfort.
5. A harness that features five passages.
6. Crafted with black waxed fibre at the back.
7. Weighing in at 10.66kg, it's designed for drivers weighing over 90kg.

In conclusion, the Bimarco Matrix is not just a seat, but a testament to advanced engineering, safety, and comfort. Its professional appearance, coupled with its durable construction, makes it an exceptional choice for discerning rally drivers seeking top-tier quality and security in their racing equipment. Choosing the Bimarco Matrix signifies choosing excellence in motorsport seating.

Personalisation	Custom logo: top, bottom, side, cushion Upholstery: color and material Stitching color Cushion pattern Back color
HANS compatibility	Yes

## PHANTOM

FIA STANDARD: **8855-1999**  
 Manufacturer name: **BIMARCO**  
 Model: **PHANTOM**  
 Homologation N°: **CS.489.22**  
 Validity duration: **up to 6 years**

The Bimarco Phantom is a state-of-the-art motorsport bucket seat meticulously designed for professional rally and racing drivers. Crafted from lightweight yet robust fiberglass, the seat offers unparalleled stiffness and durability, essential for the rigorous demands of racing conditions.

This seat is a product of Bimarco's innovative RTM (Resin Transfer Molding) technology, which not only enhances stiffness but also ensures a weight reduction of up to 30% compared to conventional bucket seats.

One of the standout features of the Bimarco Phantom is its distinctive "halo" design, characterized by the protective "ears" that offer additional head support and protection during side collisions. These ears are ergonomically profiled to maximize comfort and safety during drives. The seat's velour upholstery not only adds an elegant touch but also provides optimal support and comfort. This material is known for its durability, ease of cleaning, and resistance to wear, ensuring the seat remains in pristine condition even after extensive use.

Key features of the Bimarco Phantom include:

1. FIA Homologation 8855-1999
2. M8 side mounting holes spaced 290mm apart.
3. Removable cushions for the back, seat, and legs, allowing for customization based on the driver's preference.
4. A weight of approximately 10kg, making it one of the lightest in its class.
5. Designed specifically for drivers weighing between 80-100 kg.

In conclusion, the Bimarco Phantom stands out not just for its advanced design and technology but also for its commitment to safety, comfort, and performance. Its unique features, combined with its competitive price point, make it an excellent choice for those seeking the best in motorsport seating. Whether you're a professional racer or a motorsport enthusiast, the Bimarco Phantom promises an unparalleled driving experience.

## HAMER PRO

FIA STANDARD: **8855-1999**  
 Manufacturer name: **BIMARCO**  
 Model: **HAMER PRO**  
 Homologation N°: **CS.473.21**  
 Validity duration: **up to 6 years**

Introducing the Bimarco Hamer Pro, a mid-sized racing bucket seat meticulously designed for professional drivers, meeting the rigorous standards of FIA Homologation 8855-1999. Crafted from the highest quality fiberglass, this seat stands out not just for its exceptional durability, but also its light weight, ensuring enhanced comfort and safety on the track.

Crafted with premium-grade fiberglass, the Hamer Pro stands out not only due to its exceptional resilience but also its lightness. Such a combination guarantees enhanced comfort and safety while navigating the racetracks. With a distinct bucket-style, this seat ensures maximum lateral support, reducing displacement during dynamic driving. A significant feature that sets this seat apart is the special "halo" design or "ears", providing additional head support and safeguarding against side collisions. These contours are specifically profiled to offer added comfort and security.

The upholstery of the Bimarco Hamer Pro is done with a high-quality velour material that strikes a balance between softness and resistance to wear and tear. This assures outstanding comfort during extended track sessions. Further, maintaining the seat's pristine condition becomes effortless due to the material's easy-to-clean attribute.

**A few technical highlights:**

1. FIA Approved: Conforming to the stringent safety standards of professional car racing.
2. Harness Features: Five passages for seatbelts, ensuring secure fastening.
3. Mounting: Side mounts with M8 screws in a 290mm spacing.
4. Cushions: Removable back, seat, and leg cushions for customization.
5. Weight: A lean 10.25 kg.
6. Suitable for drivers weighing up to 85 kg.

In conclusion, the Bimarco Hamer Pro is an embodiment of advanced design, high-quality materials, and FIA's seal of approval. For professional racers who prioritize not just comfort but also uncompromised safety, this seat emerges as the clear choice. Opt for Bimarco Hamer Pro and experience a harmony of performance and protection.

## COBRA PRO

FIA STANDARD: **8855-1999**  
 Manufacturer name: **BIMARCO**  
 Model: **COBRA PRO**  
 Homologation N°: **CS.474.21**  
 Validity duration: **up to 6 years**

Designed exclusively for the professional rally and racing circuit, the Bimarc Cobra Pro Bucket Seat elevates driver experience by merging comfort, safety, and technology. Built using the advanced RTM technology, this seat is 30% lighter than its standard counterparts due to the fiberglass shell, ensuring optimal weight distribution and stiffness for narrow car cabins.

**Key features include:**

- 1. FIA Homologation 8855-1999:** Ensuring that the seat complies with rigorous safety standards set by the International Automobile Federation.
- 2. Design and Build:** With an ergonomic design, the seat naturally contours to the driver's silhouette, ensuring stability and comfort during high-intensity races. High sides and a well-profiled backrest protect the driver from lateral movements, while offering unhindered motion.
- 3. Materials:** The seat is made of the finest materials known for their durability and resistance to wear. Its upholstery is notably resilient, stain-resistant, and easy to clean – a crucial aspect considering the demanding conditions of motorsport.
- 4. Specifications:** The seat comes with 5 harness passages, M8 side mounts (purchased separately), and a set of 4 screws. It weighs approximately 9.3 kg and is ideal for drivers weighing 75-95 kg.

As the successor to the popular Bimarc Futura, the Cobra Pro has undergone significant improvements in terms of comfort and safety. Its velour upholstery ensures optimum support, while the foam lining enhances the driver's car feel. The compact shell design makes it apt for vehicles with tighter cockpits.

**Why Choose the Bimarc Cobra Pro?**

When it comes to motorsports, compromising on safety or quality is never an option. The Bimarc Cobra Pro Racing Seat encapsulates the essence of professional racing by offering unmatched safety standards, exceptional comfort, and unparalleled design. With its state-of-the-art technology and superior build quality, it stands as one of the best choices in its price bracket for those who demand only the best in their pursuit of racing excellence.

Approval	FIA 8855-1999
Construction	Fiberglass and resin composite
Fixing Type	Side mount
Harness compatibility	4 and 6 points
Protection Type	Bucket seat with integrated headrest
Designed for drivers:	75 - 95 kg
Seat weight:	9,3 kg
Seat dimensions (H/W/D):	900 / 600 / 490 mm
Upholstery	Velour 3D MESH Faux leather
Personalisation	Custom logo: top, bottom, side, cushion Upholstery: color and material Stitching color Cushion pattern Back color
HANS compatibility	Yes

Another proposition for off-road adventure enthusiasts: the Bimarco Cobra Pro FIA 2023 bucket seat in a special OFFROAD version. This innovative product will surely attract the attention of anyone looking for durability and comfort while driving.

The seat's body is made of fiberglass and resin composite using the RTM technological process. As a result, the Bimarco Cobra Pro FIA 2023 ensures durability and resistance to damage, which is crucial during off-road escapades.

But the body isn't everything! The seat cushions are made of a unique synthetic rubber - EPDM.

Why is this important? EPDM is excellent at handling moisture and is resistant to various contaminants, including oils. Therefore, even after intensive driving in challenging conditions, the seat will look like new.

What distinguishes this seat from others is its compact size. It will fit perfectly in most off-road vehicles and UTVs. Moreover, its design lacks traditional upholstery, making cleaning it extremely simple. A few moments under running water and the seat is ready for action again!

Considering a new seat for your off-roader? The Bimarco Cobra Pro OFFROAD is a choice that will undoubtedly meet your expectations.

Also available with non-homologated shell.

Approval	FIA 8855-1999

## Bimarco bucket seats for motorsport enthusiasts

**RACER**

**DYNAMIC**

**HAMER**

**COBRA 2&3**

The Bimarco Racer is a contemporary bucket seat, purposefully designed for motorsport enthusiasts participating in non-FIA homologated races and sim racing. With an emphasis on a harmonious blend of comfort and performance, it caters specifically to larger drivers, ensuring the highest level of safety and comfort during intense on-track endeavors.

Characterized by its distinctive “ears”, the seat offers additional head support, especially safeguarding against side impacts. These features are ergonomically designed, further enhancing the comfort and security during drives. Built with a sturdy and resilient structure, the Bimarco Racer promises long-lasting durability. Its upholstery not only withstands wear and tear but also guarantees comfort during prolonged racing sessions.

**Key Features Include:**

- Excellent finishing and rigidity.
- Five slots for harnesses.
- Side M8 mounting holes with a 290mm spacing.
- Removable cushions: backrest, seat, and legs.
- Verified seat weight: 10.66 kg.
- Specifically designed for drivers weighing over 95 kg.

Anti-slip material ensuring optimal support, with seat foam density designed to feel the car’s movements. Moreover, as part of Bimarco’s RTM (Resin Transfer Molding) range, the seat benefits from our in-house developed technology which enhances stiffness while reducing weight. This pioneering production method produces a fiberglass bucket seat shell that’s both lighter and stronger, achieving a 30% weight reduction compared to standard seats. In conclusion, the Bimarco Racer, manufactured in Europe, offers one of the best quality-to-price-to-performance ratios on the market. As a successor to the best-selling Bimarco Grip model but in an XL version, it promises enhanced comfort and heightened safety. It stands out as an impeccable choice for discerning rally drivers seeking top-tier quality and safety in their racing seat.

Approval	None
Construction	Fiberglass and resin composite
Fixing Type	Side mount
Harness compatibility	4 and 6 points
Protection Type	Halo seat with integrated headrest
Designed for drivers:	> 95 kg
Seat weight:	10,66 kg
Seat dimensions (H/W/D):	970 / 630 / 480 mm
Upholstery	Velour 3D MESH Faux leather
Personalisation	Custom logo: top, bottom, side, cushion Upholstery: color and material Stitching color Cushion pattern Back color
HANS compatibility	Yes

The Bimarco Dynamic racing seat, meticulously designed for both professional racers and motorsport enthusiasts, offers an ideal solution for those participating in non-FIA regulated events and sim racing enthusiasts alike. Crafted using high-quality fiberglass, the seat offers commendable rigidity and durability, essential for the high demands of racing.

Its distinctive bucket shape ensures superior lateral support, substantially reducing body shifting during dynamic track maneuvers. Coupled with a luxurious velour cover, the seat not only presents a sophisticated appearance but also promises exceptional comfort. This material is notably durable, easy-to-clean, and resistant to wear, ensuring the seat remains pristine even with intensive use.

Unique to the Bimarco Dynamic are the characteristic “ear” supports, providing enhanced head protection during side collisions. These are ergonomically designed to further ensure comfort and safety during drives. Noteworthy features include 5 harness slots, side mounting with M8 screws spaced at 290mm, and removable Velcro® cushions for the back, seat, and legs. This seat is optimal for drivers weighing between 80-100kg, and weighs in at a verified 10.25 kg.

One standout innovation is the Resin Transfer Moulding (RTM) technology, which significantly reduces weight while increasing rigidity. This technology, pioneered in Bimarco's laboratories, can produce a seat shell that is 30% lighter compared to standard seats.

#### Why Choose Bimarco Dynamic?

Evolving from Bimarco's best-selling GRIP model, the Dynamic seat offers improved comfort and heightened safety. As a part of Bimarco's RTM assortment, it stands out as a compact bucket seat ideal for narrow cabins. Its slip-resistant material and cushion foam density enhance the driving experience, allowing drivers to feel the car's movement distinctly. Produced in Europe, it strikes the right balance of quality, cost, and performance, solidifying its place as one of the best in the market.

Approval	None
Construction	Fiberglass and resin composite
Fixing Type	Side mount
Harness compatibility	4 and 6 points
Protection Type	Halo seat with integrated headrest
Designed for drivers:	80 - 100 kg
Seat weight:	10,25 kg

Personalisation	Custom logo: top, bottom, side, cushion Upholstery: color and material Stitching color Cushion pattern Back color
HANS compatibility	Yes

The Bimarco Hamer is a meticulously designed racing bucket seat crafted for motorsport enthusiasts and sim racers. Tailored as a successor to the best-selling GRIP model, this variant offers enhanced comfort, superior safety, and is a proud member of the Bimarco RTM range.

Utilizing RTM (Resin Transfer Molding) technology, the seat achieves remarkable stiffness while being 30% lighter than conventional seats. Its innovative fiberglass construction guarantees durability. The anti-slip material ensures optimal support, with seat foam density meticulously calibrated to allow drivers to feel the car's every move.

**Key features include:**

- Exceptional finish with assured rigidity.
- 5 harness pass-throughs.
- Side mounting capability (mounts not included).
- Wax-coated black fiber rear.
- Velcro<sup>®</sup> removable cushions for the back, seat, and legs.
- Includes 4 screws.
- Verified seat weight: 10.14 kg.
- Available colors: black, red, and blue.
- Suitable for drivers weighing up to 85 kg.
- The distinct bucket style offers maximum lateral support, minimizing movement during dynamic drives. Furthermore, its specially designed "ears" provide added head support and protection during side collisions.

Covered in high-quality velour, this seat combines softness with abrasion resistance, ensuring comfort during prolonged track sessions and making it easy to maintain.

**In Summary:** The Bimarco Hamer racing seat stands as a testament to innovative design combined with function and safety. A perfect choice for those who seek a professional-grade experience, whether on the track or in a simulation. Choose Bimarco Hamer for unparalleled performance and comfort.

## COBRA 2 & 3

**COBRA 2**

**COBRA 3**

The Bimarc Cobra 2023 Series epitomizes the intersection of comfort, safety, and performance. An advancement from the best-selling FUTURA, these seats cater to a broad spectrum of motorsport enthusiasts, from professional rally drivers to sim-racing aficionados.

The ultracompact design of the Bimarc Cobra seats makes it an ideal fit for narrow cockpits. Both models are crafted with a non-slip fabric, providing optimal support while the dense foam seat cushion enhances the driver's tactile connection to the car. Both seats bear an ergonomic shape that perfectly contours to the driver's silhouette, ensuring comfort and stability even in the most intense racing conditions. High sides and a well-contoured backrest safeguard the driver against lateral movements, guaranteeing full freedom of movement.

Made with top-tier materials, these seats are durable and resistant to wear and tear. The upholstery is exceptionally robust, easy to clean, and stain-resistant, vital for challenging racing environments.

#### Key Features:

Superior finish and guaranteed rigidity.

Harness slots: Cobra 2 features oval slots; Cobra 3 boasts larger slots.

Side mounts: M8 screws, 290 mm apart.

Removable cushions: back, seat, legs.

Weight: 9.3 kg.

Designed for drivers weighing 75 - 95 kg

Crafted using the Resin Transfer Molding (RTM) technology developed in Bimarc's labs, the fiberglass seat shell achieves a 30% weight reduction compared to conventional seats, ensuring a lighter yet stronger structure.

In essence, the Bimarc Cobra Series is a prime choice for those who demand the pinnacle of quality, comfort, and safety in their motorsport endeavors. Whether you're tuning your car, partaking in sim-racing, or participating in non-FIA homologated motorsport events, Bimarc ensures you're seated in excellence.
